

PROJECT RTI

# RTI made EASY.

Project RTI is **the only** fully customizable, web-based platform built for school districts that want a complete Response to Intervention Solution. This unique platform allows users to track interventions and outcomes at each stage of the RTI process. Decision-making through analysis of a student's performance trends, documentation and fact-based support to assist in collaboration between educators, parents and students are the foundation of this intuitive program that allows teachers and administrators to access all the student's data in one space. Grades, attendance, behavior, and assessments automatically populate so that interventions can be targeted and measurable. Districts praise the auto generated parent letters in the parents' home language! Experience a user-friendly student achievement focused program that includes a detailed compliance reporting system for recording evidence of fidelity to your district's goal of supporting all students.

# PROJECT EDUCATION

### About Project Education

Project Education is the leading provider of comprehensive educational software solutions to help school districts manage and track student data. But Project Education goes beyond software: we offer customizable solutions through a full family of products that are easily integrated with existing systems and processes, or can be effective as stand-alone tools. And all of this is backed up with superior client service, training and ongoing support provided by a team of experts from various educational and technology backgrounds.
