

PROJECT SPECIAL EDUCATION

SPED made EASY.

Project SPED (Special Education) is the fully customizable, web-based program that provides school districts with an efficient and user-friendly solution for managing all aspects of the special education process, from referral to dismissal. Our comprehensive system gives stakeholders quick and easy access to students' Individualized Education Programs (IEPs), assessment data and other records to more accurately track and report on student progress. The platform also includes audit and reporting features, so district leaders can more effectively and accurately manage compliance with state and federal requirements.

As part of the full suite of Project Education software solutions, Project SPED can link with all data within our platform to create comprehensive tracking and reporting and align with third-party data applications.

PROJECT
EDUCATION

Project SPED Capabilities

- **IEP Goals Wizard** guides users in developing SMART (Specific, Measurable, Actionable, Relevant, Time-Bound) goals with measurable targets to achieve those goals.
- **Evaluation Writer** assists in drafting formal reports required for evaluations, including the ability to import data from outside sources.
- **PLAAFP Builder**
- **Behavior plans**
- **Alerts** to inform district personnel when a student has been placed into a program.
- **Audit** functionality to capture critical dates and milestones.

Project SPED Features

- **Customization:** Allows you to use existing forms or processes and customize them to meet your specific data collection criteria.
- **Progress monitoring:** Provides ability to import student data including grades, assessments, discipline and attendance information to track students' progress toward goals.
- **Flexibility:** Project SPED can act as a stand-alone platform or work in alignment with the full Project Education platform. Specifically, it can connect with Project RTI and Project 504 for data accuracy.
- **Integration:** Project SPED includes user-friendly protocols that facilitate the sharing of critical information and effective and efficient reporting to save time and drive critical decisions.
