

Achieving Calm for Students Facing Crisis: Behavior Lite for ELs

Changing schools or environments is traumatic for any student. For English Learner students, that trauma can be many times worse and may involve fleeing from political strife, war, natural disasters, famine, or other hardships that are almost unimaginable. Then upon arrival, these children may face racism, bullying, rejection, depression, and loneliness in their new hometowns and schools.

It is essential for educators to replace this chaos with calm and structure. From the everyday classroom to complex social/emotional support scenarios, understanding and addressing the experiences and needs of students can offer lifelines – or lead to life-changing interventions.

Our award-winning technology is only half of our story

We supercharge all Project Education online software with people power: expert partnership and guidance from seasoned educators, administrators, and tech specialists. Our advisors can your help district and schools customize the system to your specific situations, such as local and state requirements or issues arising on campuses. **This human component – a Project Education exclusive – is integral to the winning results we help schools achieve.**

Behavior Lite for ELs can be a difference-maker for your district. Its customizable, web-based platform enables districts to provide fair, compassionate support to students and teachers in difficult situations. Data from teacher inputs, forms, discipline, and surveys is compiled to provide valuable insight into a student's situation.

Those insights are delivered in easy-to-follow and up-to-the-minute reports so you can make more informed decisions. Correct interventions then have a better chance to yield positive outcomes. Behavior Lite's Mental Health and Anti-Bullying components elevate campus and district response to incidents with instant alerts. Classroom and Social/Emotional tracking can be added on to any other Project Education program.

This Lite version of our popular Project Behavior module is designed specifically for EL students, with value pricing that can qualify for Title III funding to monitor ELs.

About Project Education

Project Education is the leading provider of comprehensive educational software solutions to help school districts manage and track student data. But Project Education goes beyond software: We offer customizable solutions through a full family of products that are easily integrated with existing systems and processes, or can be effective as stand-alone tools. All of this is backed up with superior client service, training and ongoing support provided by a team of experts from various educational and technology backgrounds.

Request a demo today and see why districts are making the switch to Project Education.
